Old Timer Dies Suddenly

The death occurred on Sunday afternoon, of Sam Fong, in his 55th year. Deceased had been around all day in apparently his usual health, assisting in work around the restaurant and was taken ill suddenly, passing away a short time later from heart failure.

Deceased was born in Canton China in 1878. In 1910 he came to Champion purchasing a restaurant, where he was residing at the time of his death. Sam had many friends and all feel a loss in his death at this time.

He is survived by his widow, one daughter and two sons living in China, and one brother, Joe Fong of Montreal.

Funeral service was held in Lethbridge on Wednesday. Farmer's were in charge of the funeral arrangements.

Card of Thanks

We wish to convey our deepest appreciation and thanks to the friends and neighbors who so kindly came to our assistance during our recent bereavement.

The Bowman family.

NOTICE !

We beg to announce that the management of the Bakery, Champion will be taken over by Mrs. Chaproniere from June 1st.

Elks Attention !

The next regular meeting of the Benevolent and Protective Order of Elks will be held in the Community Hall on Tuesday June 6th, 8.30 o'clock. Your attendance will be appreciated. H. E. GILL, Secretary

Attention O. O. R. P.

The next regular meeting of the O. O. R. P. will be held in the Community Hall on Tuesday evening, June 6th. A good attendance would be appreciated.

MAUD FREEZE, Secretary

Grasshopper Situation

The Secretary of the Municipal District of Harmony, No. 129 has received assurances from the Department of Agriculture that there is every indication of a serious grasshopper outbreak in Southern Alberta. Maps prepared on actual field investigation by the Dominion Entomological Branch show grasshopper eggs in considerable numbers in all districts, from the International Boundary, north to township 35, and from Saskatchewan west to the MacLeod, Calgary, Edmonton, C.P. R. line. With this information to hand, coupled with various reports from local farmers, the Council took immediate action, and the mixing station, under the supervision of J. D. McDougall, will be equipped and ready for any immediate outbreak. Owing to the deplorable way this poisoned bait has been put out by the ratemakers of recent years, the Department has been compelled to adopt some measures to curtail this heavy loss, hence the following restrictions must apply during 1933. Each farmer will be allowed five pounds of poisoned bait per acre, which the Department claims is sufficient to counteract any grasshopper menace we are liable to encounter in this district, any additional poison must be paid for by the individual farmer. At this point the council asks for the co-operation of every farmer in our Municipal District in combating this miserable pest, insofar as to the proper methods of putting out poisoned bait. Science has proved to us beyond doubt, that to put this mixture out on a cool, damp or windy day, with the temperature around 65° F. is useless, and money wasted. Grasshoppers will lay for days at this temperature without feeding, so that great care should be exercised to see that the day is calm, and the temperature 75° to 85° F. when the hoppers will feed ravenously, and thus assure 100 per cent kill.

Trusting to be favored with your co-operation,
Sincerely yours,
C. RHODES, Secy. Treas.

Women's Institute

Twenty-four members and guests of the W. I. met at Mrs. McLean's on Tuesday evening. Mrs. Baker gave an admirable report of the Provincial Convention, it was just as good as being there and far less trouble. Mrs. Hagerman treated us to a splendid review of Canadian Authors and their works, "Canadian" in reference more to the writing than to the writer, some of whom have not spent much time in Canada. Of course, the lunch was the best in the land, judging from the quantity and variety there must have been seven hostesses.

In addition to these, two very good speeches were given, and music by Misses Barbara Wise, Rheta Campbell, Mayis Moffatt and Marjorie McCullough made it still better. The course in "Dry Cleaning" is to be given on June 16. A public meeting in the Hall on June 13, will deal with Canadian industries.

A new law provides that cars must carry rear and reflectors visible under an automobile headlight for 200 feet. The reflector is in addition to the customary tail light.

"Opportunity Schools"

Students Learn Every Trade Imaginable At Deaver Institution

A school which opens at 8 o'clock in the morning and doesn't close until 9 o'clock at night, where students are not entirely to sleep and where automobiles and electric motors are repaired by the students—such is the famed "Opportunity School," at Denver, Colorado.

It was one of many described by Dr. J. H. McKechnie, chief director of schools, Saskatchewan, in an address before the audience of teachers and others in the auditorium of Central College, Regina.

Dr. McKechnie told of his recent tour through the northwestern portion of the United States, visiting the various schools which he visited and the different systems in vogue in cities to the south of the border. His visit, he said, was primarily to view schools for the deaf.

The Deaver school, he stated, is entirely vocational and every trade imaginable is taught students. To get the school grant the school must take in "trade," repair autos, motors and like, charging the public current rates.

At Minnesota the same principle applies. There, in a huge girls' vocational school located in one of the busier sections of the city, the students get actual experience by serving meals to the public at a large cafeteria. All dressings made in the institution are sold by the students in the same school.

The trend in the States Dr. McKechnie said, is toward junior high schools, which is hoped to see some day established in Saskatchewan.

Hint For Vacation Days

Planes Often Derived From Inexpensive Short Trips

Vacation days are coming! Now is the time to plan a vacation from the glorious summer by all kinds of travel talk. The back yards of periodicals with their alluring appeals to pack up and go places entice readers from the fiction in the front.

Even if one has to do his globetrotting mostly via the advertising columns until those off the gold standard get back on again, or those on it jump off, he yet can indulge his bent for change. For much of what one gets from vacation depends on the kind of break one takes. The seeds of humor may find expression vent within the confines of an ocean liner or the limits of an overnight stayage on a coastwise steamer.

Scenery, however grand, may not always pay off; one's fellowmen can never be won, indeed to the lover of his kind. It may even be guessed that phantoms are found in farmyards at least as often as in Pullmans. Long-legged children who run because mere walking seems so slow, and the lightsoons a matinese of young people clinging to a matinee may give us decent details of a trip to Spain—to those who have eyes to see.

—Christian Science Monitor

Was Once Smart Vehicle

Hansom Cab Popular In London Thirty Years Ago

London will celebrate this summer the centenary of the hansom cab, the first of the modern forms of vehicles in which to move about the city. There are but four now left upon the streets of London. Gasoline and the building of the taxicab spelt the knell of the hansom.

Thirty years ago there were 7,000 hansom cabs in London, enough to fit two passengers, and with the driver in a "dickey" at the back, the rider passing over the roof of the cab, the hansom was in its day considered the smartest thing upon the streets. The drivers arrayed in mutton coats, with buttonholes, and belts and beaded whips, were as witty as three of the contemporary horse-drawn omnibuses. There was a spice of danger attached to riding in a hansom (which doubtless made them all the more agreeable to the adventurous), and the horses came down. It was likely, as not that with the car pitching forward and the doors flying open the occupants would be thrown into the street.

Nowadays the four remaining hansom in London ply quite a fair trade among the tourists, who like to remember the old days. A full-sized hansom cab—taken off the streets, as it were—was placed a few days ago in the London museum.

Bank clearings in Mexico have been increasing for several months.

London women are taking up wrestling.

DELEGATES FROM SIXTEEN NATIONS ATTEND POSTAL CONFERENCE

Employs Sailing Vessel

Bishop Of The Arctic Uses Boat To Carry Supplies To North

Acquisition of a 67-foot sailing vessel by Mgr. Arsene Turquetil, vicar apostle of Hudson Bay, and known throughout the northern missions as "Bishop of the Arctic," has secured the services of missionaries of the North American polar regions.

Each year, about 150 tons of merchandise are shipped to Bishop Turquetil's diocese, and due to heavy snows the bishop has been faced with the alternative of closing up several important missionary posts or of securing cheaper means of transportation. With the 33-ton boat, the only expense will be the crew's wages. Bishop Turquetil is a graduate of the seminary of the Roman Catholic Church who has a vessel at his disposal for the execution of missionary duties.

The boat, now stationed at Halifax, will soon leave for Churchill with a load of coal and other merchandise for the prelate's mission. The Bishop will leave here shortly for Churchill by rail.

No Municipal Election For Fourteen Years

Mayer Of North Carolina Town Considers Them Foolish

Those who believe that the ancient art of voting is a waste of time and a waste of money, may be surprised to learn more than 1,000 leeches are imported weekly by air mail from France for up-to-date London hospitals.

These leeches are gathered from ponds in the town of Frambois, France, and are sold in right sizes, packed containing mud and damp moss.

When they reach their destination they are placed in a tank of clean water, where they remain unfed until their use is required.

—The Star

Captain Assets Gulf Stream Is Running Close

Captain George G. Grant, skipper of the steamer "San Blas," came port at Boston with the assertion that the Gulf Stream, the river that flows through the ocean, had changed its course and increased its speed.

The drift, arrayed in mutton coat, with buttonholes, and belt and beaded whip, was as witty as three of the contemporary horse-drawn omnibuses.

There was a spice of danger attached to riding in a hansom (which doubtless made them all the more agreeable to the adventurous), and the horses came down.

It was likely, as not that with the car pitching forward and the doors flying open the occupants would be thrown into the street.

Governor-General's Tour

Their Excellencies To Visit Western Provinces This Summer

Definite word has been received by Prime Minister Lester B. Pearson, as to the itinerary of their Excellencies, the Earl of Beauchamp and Lady Beauchamp, on their western trip this summer. After attending the World's Grain Congress Show in Regina on August 4, the Governor-General's party will arrive in Edmonton on August 4 and will spend the next day at Peace River. A tour of the north country will be followed by a holiday

at Jasper.

Can Keep On Rocking

Dues No Harm To British St. University Professor

Harrassed parents, torn between a desire to rear their infant along scientific lines and an urge to keep the child contented, may welcome this.

Dr. W. C. Beasley, professor of psychology at the Johns Hopkins University, has given his approval on one thing mothers have been doing for centuries—rocking their children. Opposing that group which has held that under no circumstances should the infant be rocked, Dr. Beasley said actual experiments had proved it does not harm the child.

Dr. Beasley even went further. He went that age-old habitués have of swinging their babies high in the air does no harm—provided, of course, the baby is not dropped.

Old Medical Practice

Leeches Still Used By Hospital In London, England

United States First Circus

Originated In Year 1752 In Philadelphia Riding School

The first circus in the United States originated in Philadelphia in the riding school started by John Bill Ricketts in 1752.

The riding school had as its distinguished patron George Washington, who, according to the story, had been so impressed by the performance of the students that he gave his approval to Ricketts' Riding School to seek enjoyment and pleasure."

As part of his plan to draw clients Ricketts employed a man by the name of Signor Adamo to teach the children to ride. Later he hired Signor and Madame Spinacorta, the former a tight rope walker and the latter an equestrienne, to entertain his customers.

Later another Philadelphian started a circus, eight years before P. T. Barnum opened his "Great Show on Earth" in New York. He was Adam Paurographa, a Civil War horse trader.

Leopry Not Inherited

Disease Never Contracted By Healthy Person's Doctor

Leopry is not inherited and children do not contract the disease if separated early from their parents. Separation from members of the Mission to Lepers in London, England, pointing out that there was no hereditary factor in the disease.

Dr. Whittaker said that there was very little of a racial factor in the disease and that no racial or social factors were discernible.

As a rule the disease occurs between the ages of 10 and 30, although it may be contracted in middle life.

Dr. Whittaker said.

Hollanders Buying Cars

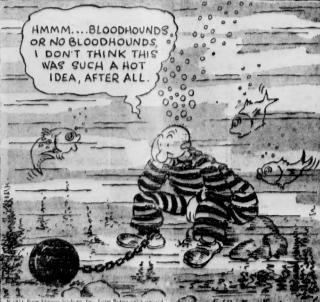

Autumn Is Best Time For Purchasing, In Holland, and Consequently Imports Are Heavy.

The form of conveyance has been increasing and, despite the depression, the automobile trade has been one of the few branches of business to maintain a high level of activity.

The fall season in Holland is the best time for purchasing cars. On August 1, 1932—the latest date on which information is available—there were 75,369 passenger motor cars in operation in the Netherlands.

The element of hydrogen is the lightest substance known to science.

FANCIFUL FABLES

Gardening Notes

By Gordon L. Smith

Roses require fairly deep cultivation and heavy fertilizing up until the first of July in order to push growth and produce flowers. After this, however, it is advisable to slow down so that the plants may get hardened before the cold weather comes in. In this process, which takes six to three months, it is a good plan to plant a few low-growing plants such as pansies, calendula, violas or dwarf nasturtiums around the roses, which will brighten up the bed and protect the soil from the cold temperature. At this time a good quick-acting fertilizer is advised. After July, however, a slower fertilizer, such as liquid manure, or bone meal should be used.

Pests and Diseases.—Control of insect pests and common diseases is not difficult where prompt measures are taken just as soon as the enemies appear or better still, before. It is very important, however, that the names known about the habits of these pests that one is trying to combat. Generally speaking, insect pests are divided into two groups, those that take their food by biting holes in the foliage and those that simply suck out the juices. The bitters are easily discovered, while the others are known only when something like this happens in a garden nearby, one should take precautions immediately. For the eating insects apply poison such as Paris Green or Aldrin to the leaves. Snakes are controlled by a spray that will burn them but not damage the foliage. Under this heading comes Nicotine Sulphate or more commonly known as "Black Leaf 40." While Oil, Seal Liner, Smoker or any other oil-based sprays will do the trick. Often one can get a combination of burning and poisoning in a special mixture and this is usually the best to procure for small gardens as it is prepared especially for the purpose.

At the Charlottetown Experimental Station, pasture improvement work was started in the spring of 1929 notes J. A. Clark, superintendent. Three four acre plots were fenced and one was sub-divided into three sections, so that the grazing might be rotated. The plots were frequently clowned. The rotated pastures and one continuous grass area were fertilized with the following mixture of chemicals per acre: One hundred pounds sulphate of ammonia, 300 pounds superphosphate, 70 pounds of lime and 75 pounds of potassium of potash. The sulphate of ammonia only was used. Then in the fourth year the original mixture was applied, to be followed with sulphate of ammonia for two years. The third plot was grazed continuously and received no fertilizer. The whole area at the start was covered with natural grasses, some clover and many weeds.

There has been a very marked improvement in the quality and kind of forage on the fertilized areas. These pastures produced good grazing much earlier in the season and continued to produce good grazing for a much longer period every season than the check or unfertilized area. The fertilized areas in 1931 had more than twice the total production of milk during the season. In 1932 the increase of both days grazed and milk produced were even more marked in the fertilized areas over the check field.

Live Right To Live Long

Advice Given By 75-Year-Old Retired Sea Captain

To live long, "live right," says A. E. Johnson, 75-year-old retired sea captain of Cleveland, Ohio, who has visited every country in the globe.

Johnson declared as daily exercise he rode a bicycle 20 miles or else he walked the same distance.

"Growing old comes from the transgression of natural laws. Age should have nothing to do with a person's vitality. If you live according to nature you will not grow old," he said.

New Legislation

Winnipeg, Man.—The act for maintaining parents by their children in new legislation just ended, indicating that parents who are indigent should be assisted by their children, when the latter in the opinion of a court or magistrate are in a financial position to do so.

Stock poisoning from local larkspur is reported on farms west of Edmonton, Alberta.

At a meeting of the Leusden Women's Institute, on Dartmoor, Mrs. Fraser won a competition for eating jelly with knitting needles.

The Leader for Forty Years

"SALADA"

TEA

"Fresh from the Gardens"

Shall Broadcasting Become a Monopoly?

Canadian policy regarding radio broadcasting is a very live subject for discussion and naturally so because the radio stations can do something in the home of the radio. In many places, and more especially in rural parts or where a daily paper is not immediately available, now look to supply them with the current time, weather forecasts, latest market prices, outstanding news events throughout the world, music for a little dance, religious services, and entertainment of all kinds. It is, therefore, only natural that policies and regulations governing radio broadcasting are of great interest and concern to Canadians as individuals as well as to Canada as a nation.

Following investigation of the subject, a Royal Commission reported unanimously in favor of nationalization of broadcasting in Canada. Later a Parliamentary committee endorsed the policy, and finally, by a non-partisan vote in the House of Commons it was adopted. There was almost unanimous unity on the subject and Canadians everywhere were called to believe and act upon the fact that creation of a national undertaking and service. That was only a year ago, but that unity has disappeared and dissatisfaction is being voiced by the press, numerous organizations, and individuals everywhere. It is rare indeed to hear of any person who is satisfied. The general dissatisfaction has been aired in Parliament and Premier Bennett has promised further study of the whole subject by a special Parliamentary committee next session in an effort to bring back the old unity that prevailed two years ago.

What caused such a complete change in public opinion in a few months cannot be discussed in detail, but from the very beginning the Radio Commission application seemed to have had a tinge of anti-nationalism and even phoniness about it. At first there were apparently by many, but not many, variety in programmes was forthcoming, nothing but symphonies and orchestras from Toronto and Montreal, people who desired something else began to criticize. Then followed a series of restrictive regulations and prohibitions imposed on all stations in the name of the public welfare, which did not seem to please anybody with the alteration of the wave lengths of stations throughout Canada in such a manner as to shut out many of the most popular programmes from United States stations in an apparent effort to compel Canadians to listen to the Canadian Commission's programmes whether they desired to do or not.

The Canadian government, a number of provinces, and an official sense Canada being a bilingual country, the Commission is forced to present programmes in French as well as in English. Thus many of its programmes are quite un-understandable to thousands of people in the Provinces, other than Quebec, and while they do not object to programmes being broadcast for the French-speaking portion of the population, they do resent the action of the Commission in so changing wave lengths that they cannot listen to other programmes. Furthermore, many people feel that these French programmes might well be confined to Quebec and not carried from coast to coast.

Announcement is now made that the Radio Commission proposes to build a high power station at St. John's, Newfoundland, in British Columbia, and that with the erection of three stations at a cost of approximately a quarter of a million dollars all present stations will be reduced to 100-watt power, thus reducing them to the status of stations with a range limited to a small local district. The result must be the closing of all such stations because they cannot command the commercial support necessary for their existence.

In other words, it is not merely public control of radio broadcasting in Canada—which the vast majority of people favor—that is now contemplated, but the creation of a Government monopoly of broadcasting, which is quite a different thing, and a proposal which has aroused strong protest. What is the intent back of this latest decision? It seems to be stated by Mr. A. E. M. M. Moore, Java, in a letter recently published in the *Star*, in part: "The proposal of national broadcasting is going to be carried to its logical conclusion, it means the ultimate wiping out of all small stations. This, it seems to me, is inevitable, and the whole question is—shall we continue the policy of national broadcasting or go back to the individual, privately owned broadcasting stations? That national broadcasting will be more economical there can be no doubt. Whether it will, or will not suit the public better, or even whether it will or will not serve them better is another question."

Here is a question in regard to which the people most concerned—the listeners—in—should make their views and wishes known to their local M.P. in order that he may present their views to the Parliamentary committee next session. And in the meantime, it would appear that the proper policy would be to keep the matter in the public eye, to stay close to the expenditure of large sums of public money in the erection of new broadcasting stations until the Parliamentary committee conducts its investigations and reports its findings.

The Prairie Crop Acreage

Two-Third of Field Crop Acreage
Of Canada in Three Western
Provinces

Over two-thirds of the field crop acreage of Canada is concentrated in the three prairie provinces, and most of this area is devoted to the grain crops, with wheat predominating. Recently, however, a specialized wheat area covers the southern short grass plains from the Red River Valley of Manitoba to the foothills of Alberta and attains their greatest width in central Saskatchewan.

London recently had a bench show for duchshunds only.

Within His Rights

Man Considered Dead By Courts
Objects To Paying Income Tax

He was asked if he had any objection to pay an income tax?

That is what Jean Baptiste Arnoux, fifty-seven-year-old roadman of Beauveze, France, may ask the courts. He stood through the World War, serving in the army for four years, to prove that he was an invalid. When he was told that the records showed that he had died when he was only a few days old. He appealed, unsuccessfully, to the courts, and is now considering refusing to pay his tax on the ground that dead men cannot be taxed.

France has definitely banned child prodigies from the country. Legally no minor under thirteen is able to work, but special licenses have been issued. The Cabinet has decided that no more of these will be given. Children working for the aims are considered to be child labor are arrested. The decision follows the receipt of reports by the Minister of Health and Public Education that children on the stage are made to work long hours without sufficient time for study.

Headaches and Dizzy Spells Herves In Bad Condition

Mr. Neil Crawford, Hamilton, Ont., writes: "My nerves were in such bad condition I found it almost impossible to get a good night's sleep. I also bothered with headaches and dizzy spells."

I tried to give myself remedies, but they did not seem to give much relief, but after I had seen Dr. Milburn's Heart and Nerve Pills I hardly believed the change they had made in my condition."

For sale at all drug and general stores; put up only by The T. Milburn Co., Toledo, Ohio.

Seeking Lost Continent

British Scientists Are Preparing To Explore Indian Ocean

British scientists are preparing to explore the bottom of the Indian Ocean, four miles below the surface, in a search for traces of the lost continent of "Lemuria."

An expedition under Captain J. M. Mackenzie, who captained the "Dixie," which circumnavigated the world, will leave London in August to begin the search. They will be nine months at sea (Africa and India) in a tiny research craft of only 105 tons.

The vessel will be fitting at Alexandria with latest inventions for oceanic sea-exploration experiments.

Steel bottles, which close automatically at a certain depth, will be let down to take specimens of the sea floor and recent marine life. Lead weights will be dropped four miles to take samples of the ocean floor.

In this way the expedition hopes to discover traces of the continent of "Lemuria," which is supposed to have stretched from Madagascar to Sumatra and in prehistoric times included another object of a discoverer—there are mountains ranges and ridges under the sea such as the Meteor expedition found in the Atlantic.

The scientific leader of the expedition will be Col. Seymour Sewell, D.Sc., director of the zoological survey of India.

Weather Man Fickle

Has Always Staged Sudden Changes
Old Diary Proves

Judging from a diary kept by Mrs. Judith of Guelph, you would never guess that she was the commander of the German mercenary troops stationed at Three Rivers, Quebec, from 1778 to 1782, the weather man was just as fickle in her day as is now. In fact a sudden change in temperature spoiled her chances of getting to Montreal for her spring vacation.

Mrs. Reidelle's diary discovered by officials of the McCord Museum in cutting over material for an extensive exhibition illustrating Canadian history during the war of 1812, shows that it was evidently her custom as becoming a lady of rank and distinction to do her shopping in Montreal. In keeping with this custom she set out one spring for the metropolis, but was disappointed in finding on the ice of St. Lawrence, At Sorel an overnight stop was made and during that a rapid change in the weather took place. Imagine her disappointment when the good lady awoke next morning to see a boat sailing up the river where she had only the night before travelled on ice.

Mr. Reidelle's diary discovered by officials of the McCord Museum in cutting over material for an extensive exhibition illustrating Canadian history during the war of 1812, shows that it was evidently her custom as becoming a lady of rank and distinction to do her shopping in Montreal. To Salvage Gold

Italian Vessel Engaged In Raising
Treasure From Sunken Liner

The Italian freight ship "Antilope" has been engaged for a second attempt to raise approximately \$1,500,000 in gold still in the strong room of the sunken P. & O. liner "Egypt," lying 70 fathoms deep off Point de Raz.

In four previous summers of work the "Antilope" has recovered \$2,000,000 of the total cargo of \$5,000,000 in gold and silver which the liner carried from London on her last voyage, May 19, 1922. The "Egypt" sank in 20 minutes after being rammed in a fog, by the French freighter "Orient" which had been loaded with 291 crew, 96 lives were lost.

After finishing with the "Egypt," the "Antilope" probably will be engaged by the Egyptian government to seek gold and other treasure from Napoleon's ships which were sunk by Lord Nelson at Aboukir Bay in 1798.

**Child Prodigies Banned

Any Under Thirteen Are Not Allowed
To Appear

France has definitely banned child prodigies from the country. Legally no minor under thirteen is allowed to work, but special licenses have been issued. The Cabinet has decided that no more of these will be given. Children working for the aims are considered to be child labor are arrested. The decision follows the receipt of reports by the Minister of Health and Public Education that children on the stage are made to work long hours without sufficient time for study.

The colors of the king of England's racing stable are purple, gold, bridle, saffron sleeves and black velvet cap with gold braid.

British Columbia is the largest silver-producing province in Canada.

Many new small factories are being started in Japan.

Not a Pain at 78

She Feels Like 48

Aches and pains are not inevitable in old age. When they do come, there is a simple rule for them which can be overcome. It is a little lesson on growing old, by a woman of 78.

For the last five years I have eaten Kruschen Salts and I feel young again. I am 78 years old. I have not a pain in my body, and I feel as young as ever. I eat Kruschen Salts. No one will believe my age."—Mrs. C. M.

For the last five years I have eaten Kruschen Salts and I feel young again. I am 78 years old. I have not a pain in my body, and I feel as young as ever. I eat Kruschen Salts. No one will believe my age."—Mrs. C. M.

Exhibits From Britain

Good Representation From United Kingdom For World's Fair

Leading representatives of the agricultural industry in the United Kingdom will represent the government at the world's grain conference, opening in Regina, Sask., July 24, while agricultural, milling and other interests will be represented by the government. The question of sending delegates. It is probable that for the first time in history there will be a record amount of all waste matter from the system. And almost immediately after the conference returns, they will be energetic and happy. In a word, they've got that famous "Kruschen Feeling."

Three New Aircrafts

Three new aircrafts, now in process of construction in England, will be shipped in parts to New York and will be re-assembled at Roosevelt Field. It is a twin-engined monoplane of the De Havilland "Dragon" type, and would normally accommodate six passengers, pilot and baggage.

Three vast cylindrical tanks placed so close together that they resemble the boiler of a giant locomotive behind the pilot's seat, replace the passenger's seat. Only one pilot's seat is provided in the forward cockpit, with just enough elbow room for the Mollisons to change over the controls of the aircraft. There is a hatchway only one foot in diameter through which they can crawl from the cockpit, underneath the tanks, to a tiny cabin in the tail of the machine.

One pilot's seat is provided in the forward cockpit, with just enough elbow room for the Mollisons to change over the controls of the aircraft. There is a hatchway only one foot in diameter through which they can crawl from the cockpit, underneath the tanks, to a tiny cabin in the tail of the machine.

The gasoline engine will enable the machine to fly up to 6,000 miles the average speed being 150 miles an hour. The fuel tanks of the engine will be limited to 1,000 miles. The 100-mile limit should be exceeded.

Other details regarding the machine and its equipment are being kept secret, but it is believed that the aeroplane will carry radio.

Plan Long Flight

New York To Bagdad Is Aim Of

Some time this summer James A. and Mrs. Amy Mallison, famous British husband-and-wife aviators, will hop from Roosevelt Field, New York, on an attempt to set up a new long-distance record by flying non-stop Bagdad or beyond.

If they make Bagdad they will have beaten by some 100 miles the record of 5,340 miles established in February of this year by the British airmen Niccolais and Gayford, when they flew from England to South Africa.

Roosevelt Field was chosen by the Mallisons as the starting point for their first dual serial adventure because it is the only suitable airport in the country ready.

The latest word of their machine will be such that experts have advised the flying couple that there is no aerodrome in England having sufficient length and firmness for taking off purposes.

The machine, now in process of construction in England, will be shipped in parts to New York and will be re-assembled at Roosevelt Field. It is a twin-engined monoplane of the De Havilland "Dragon" type, and would normally accommodate six passengers, pilot and baggage.

Records Carefully Kept

Piety Of Documents About Hudson's Bay Company Trading Posts

"Never has the frontier life of any company been so well documented and as thoroughly documented as the journals of the fur trade posts of the Hudson's Bay Company in Canada," said Douglass MacKay, speaking to the Kinross' Club of Montreal.

"Under the terms of the original royal charter, London, the head office of the Hudson's Bay Company, remains the repository for all the company's archives, and the gathering of these from the posts and outposts a few years ago resulted in a collection of documents, six boxes of documents," Mr. MacKay declared. The work of organizing and cataloguing this material has been proceeding under the direction of the company's archivist in London.

At the same time, the valuable documents of historical documents, which is in reality the richest source of material of western and northern Canadian history, is in better shape than ever before.

Earned Gratitude Of
Indian Mohammedans

Lord Lothian Arranged Return Of
Valued Robe To India

Lord Lothian, former Under Secretary of State for India, has earned the gratitude of the Moslem community of India by arranging for the return to India of a robe which on which is inscribed the whole of the Koran.

The Koran is the highly revered Mohammedan Bible. The robe was taken away from India at the time of the mutiny of 1857. It has remained in England in the hands of a noble family. Through Lord Lothian's intervention the owner has made a gift of it to the Muslim University of Aligarh, where the robe has been placed in a prominent position in a showcase and is venerated by the faithful. Lord Lothian is known about the history of the robe.

A Heavy Responsibility

The city council of Chicago, by resolution, has given Alderman John Coughlin, the Beau Brummel and friend of many, the sole responsibility of designating the date when Chicagoans may put on their straw hats.

"You mean," suggested the magistrate, "that it grows at you?"

"No," the man insisted. "I growl at the dog."

Tons of gold bullion placed in a secret "war chest" before Japan went to the gold standard are said to exist in Tokyo.

Italy expects an increase in employment in the next few months.

Modern Home In Sweden

Disabled Poor Will Have Every Care
and Comfort

Sweden is completing constructions of its new home for the disabled poor at Stockholm, Sweden, and it is dedicated to be the most modern in Europe. Latest equipment for curing rheumatism, nerve diseases, asthma, and other afflictions has been installed by the State Pension Board. Five experienced physicians and a large staff of assistants are here to care for the disabled.

At the same time, the valuable documents of historical documents, which is in reality the richest source of material of western and northern Canadian history, is in better shape than ever before. Success at rehabilitating the disabled penitentiaries has been encouraging in Sweden, as about 60 per cent of the patients treated have regained ability to earn their own living.

Rhubarb Pies Once Medicine
Rhubarb pies and rhubarb sausages are now quite common every day. The rhubarb plant was used in medicine long before its value as a food became known. It grows wild in the fields and is used in the making of tarts. Its root is used in the making of pies.

Rhubarb is a native of China and was introduced to Europe in 1620 and soon became common. It was cultivated by the early settlers when fruit was scarce.

The office bachelor says the difference between an animated doll and a modern girl is that the latter doesn't holler "Mamma" when squeezed.

Britain has nearly 50,000 police men on regular duty.

It dusts—as it cleans—as it polishes.

CHAPTER XI.—Continued.

Haskell saw that his own real difficulties were far from over. He had to earn his right to command again, and winning his personal liking that called for shrewd psychology, but on that point he knew he could make Alan Baker look like a stammering farm boy.

The next evening, when Haskell arrived at the barracks, he took him on an inspection tour of the post. Finished with that, they stopped and talked together on the slope, a little distance from the barracks. A respectful distance behind them Corporal Whipple waited, note paper in hand, ready to scrape and salute if they glanced his way or asked for any favors.

Haskell was elated, he was secretly exultant, at his success so far in "working" his superior officer. William was equally pleased with the inspection. Backtracks, Sabotage, dog teams, canoes, guns—everything was in capital shape.

This auspicious beginning was all well enough, Haskell felt, but his trouble with Baker was far from all-clear. What was he going to do to make or break him. The whole outcome depended on Williamson; depended on whether the division commander would believe his story or Baker's. As yet he had been unable to decide, he thought. The superintendent had heard a few of the bare facts on his way down the Mackenzie, but he had left headquarters before Baker's buying-out papers had reached there for his signature.

Haskell decided that the old officer had been favorably prepared for the story now; and he let it in gradually, shrewdly. Starting with the Midnight Sun robbery, he gave a detailed account of this last month, down to the hour when Pedneault stole the launch and joined Baker's vanity.

"What hurts me the most, sir," he added, with a consummate show of real sorrow, "is the refusal of these men to help me. I am not able to help them. Maybe I am at fault, I know. But by way of example, sir, if Corporal Hardwick had told me about needing gas and oil, he could have had every drop at the post. But he didn't tell me. I am not sure he took him. An alias brought me word about him waiting at Es. Traverse Lake for Baker. I figured Baker might need extra supplies or help, so while Whipple I went down there right away. It is the sort of desperate act in connection with Baker. Even got signs for him to wait. But he scoured our offer."

"When I got back here," Haskell went on, "I planned to give up the Alasca and take him supplies. Wanted to put everything I had at his

disposal. He's the best man-hunter in the country, and I felt he would get Dosee criminals if anybody could. I didn't give a d—n—if you'll pardon me, sir—about him being so hostile to me and all that. All I care about was to help him run down those bandits. If they escape, it will be a blot on the splendid record here at Endurance. But, as I explained, Pedneault told me a lie about some trouble in the Indian camp, and ran off with the launch."

As he watched his superior's reactions, Haskell smiled to himself. His generous praise of an enemy was having its calculated effect. He was beginning to gain the old officer's confidence. He was gaining Williamson's sympathy, his approbation. He had beaten down the old officer's former prejudice against him, and had instilled a new one against Baker.

For moments afterwards Williamson made no comment. Surprised and alarmed at discovering this bad blood here at an important post, the old officer gazed steadily down upon the prairie.

His gray eyes, which through forty years of self-sacrificing service, had looked upon human weakness and hardships and heroisms, were filled with a profound solicitude. What had him to the task? This was now at his faith in Alan Baker. He had always liked Alan, had trusted him as he trusted few men; and had fought for his promotion. He, who had given four years of his life to the service, had a miserable salary; while his brother officers of the guard had unselfishly watched other men of their generations carve out fortunes in timber, ranches, land and mines in the West, and had given up their time to earn nothing since dawn.

He regretted that little authority Joss always claimed for his superiors had the half edge of it that time he lifted her down from the window. Knowing her spirited pride, her passionate nature, he had fearfully imagined her choosing a tragic escape from her perch.

It was he and Buzzard had forced

themselves to eat supper and were putting the things in order again, as though for joy to come back and find that they had already drawn away the big Alasca. A broad, whistled the faint sound away a few minutes. When they caught it again, the sound was clear and unmistakable. They once had heard that noisy throaty drawl approaching along the trail, and had to destroy their plane and stop their visitors.

It's Haskell. He's coming to smash us. He didn't quit with that one attempt. I don't think—even if he knew that you and I all stand that stands to us both as honest men, don't think he hesitated around Buzzard, you stay here. I'm going down to the landing. I don't want you to be involved—in suppose I'll be called in."

It went out through the trading hall and down to the landing, and crouched there behind the machine gun. With his hand on the spike grip, training the weapon down river, he waited.

It was intended to be a lurch tearing wide open on the treacherous Alasca, he grew convinced that Whipple never would or could drive it at so demone-like a clip. Frank Pedneault was the man behind that what sounded.

"Haskell might have forced him to make the trip. But Ped would never throw himself into it like that; he'd never risk his life that way, unless it was something he felt like putting his neck on."

Lifting the binoculars, he focused them on the first bend below. When the launch came tearing into sight and thundered on up toward the post, he saw at a glance that it carried but one man—a man with his hat jammed in his eyes and a dead head in his teeth.

Swinging the launch around in mid-stream like a toy, Pedneault gently nosed it in beside the planks. "Thank Lord you're safe, Alan. . . . Was afraid he'd be here."

"Ped! What are you doing up here? You're on some patrol?"

"Patrol h—!" Pedneault panted, breathless and excited. "I caught onto your idea, Elizabeth. I told her to go to town and buy a boat to win over Larry and I talked it over. I said, 'By Lord, I'm going. Larry! I'm going to be in on that with Alan and Bill!' So I echewed the launch away from Haskell, pitched off, and streaked for here. Brought you some extra gear, I guess, any."

Alan was staggered. To be continued.

same they resented it. The fault is theirs, not yours. I'm backing you to the limit against them and against Baker, too. If we tries to stir up any further trouble."

Haskell drew a deep breath. His story had gone across handsomely. In half an hour of skilful talk he had accomplished more than Baker could match in a month of labor and heavy expense and danger.

For Alan and Frederick there at MacMillan's trading post after their discovery of the catastrophe, the waiting was the worst of it—the long hour after hour of grim, self-enforced delay.

"We've got to let them get out of timber country into the open Thal-Azabah," Alan spoke to Buzzard, who was looking to his experience and leadership in this fraught crisis. "We can be sure of sighting them again when we get back to them, when we drop down on them. We'll make ourselves give them a fifteen hour start on us."

It was his cold man-hunting wisdom that spoke; but all his being was bent to instant, flinging himself at least those men and tearing joyces away from them before twilight fell.

He forced himself to a meal, to the trading store and cook a meal, for they had eaten nothing since dawn.

He regretted that little authority Joss always claimed for his superiors had the half edge of it that time he lifted her down from the window. Knowing her spirited pride, her passionate nature, he had fearfully imagined her choosing a tragic escape from her perch.

When he and Buzzard had forced themselves to eat supper and were putting the things in order again, as though for joy to come back and find that they had already drawn away the big Alasca. WORLD HAPPENINGS BRIEFLY TOLD

Canada's net debt (Dominion) was placed at \$2,500,000,000 with the annual interest \$121,687,300.

An aluminum observation and sleeping car, will be the Pullman Company's exhibit at the century of progress, Chicago.

Gregory M. Zinoff, twice expelled from the Communist Party for oppositional activities against Joseph V. Stalin's leadership has confessed his sins and pleaded for reinstatement.

A payroll increase of \$150,000 a month in the Douglas Fir Plywood Industry of the United States Pacific Northwest, Oregon, will be put into effect by July. It will affect 6,000 workers.

Far surpassing the record tourist invasion of Winnipeg, a tremendous tourist invasion of Winnipeg is predicted by Mayor Ralph H. Webb, who has returned from a two weeks trip to the United States.

King George's gallant old racing yacht, Britannia, has taken to the water for the 40th season. In her long career she has taken part in more than 600 contests, and won more than 20 prizes.

Establishing something like a record in voyages of the preventive service of the Royal Canadian Mounted Police, the customs cruiser, "Adversum," slipped 36 days off her estimated time for a trip from Halifax to Vancouver.

The four big powers of western Europe are at war in Europe and in the world." Under-Secretary for Foreign Affairs Fulvio Squillati told the Chamber of Deputies at Rome, Italy, in a discussion of Premier Mussolini's four-point peace pact.

Tobacco is being grown as an experimental crop on the Headings Provincial Prison Farm, Hon. D. G. McKenzie, Manitoba Minister of Agriculture, announced. If the crop is harvested the tobacco will be given to prisoners for their smoking requirements.

Canadians Like Ice Cream

Total Consumption In Year Over Eight Million Gallons

It is evident from a record issued by the national government bureau of statistics on the consumption of products in Canada for 1931 that Canadians have an appetite for ice cream. The total consumption in the year under review was 8,234,272 gallons, an increase of 2,783,138 gallons, compared with the previous year. In 1931 the 1931 production was valued at \$11,615,595. The Canadian government bureau of statistics states that ice cream is an article of food. It possesses all the elements of a real food, being easily digested, palatable and satisfying.

The production of ice cream in the Dominion is carried on chiefly by the dairy and confectionery industries.

The per capita consumption of ice cream according to the latest figures is 10.5 pounds. The provinces showing the highest per capita consumption were Ontario, British Columbia and Nova Scotia with 11.69 and 87 gallons respectively.

A Powerful Generator

Part of Equipment of New Laboratory At Cambridge

The wonderful Ludwig Mond Laboratory at Cambridge, just opened, contains an apparatus for splitting the atom on a scale unknown before. It is an electrical generator which will produce the equivalent of 100,000 horsepower, comparable with the output of the largest of London's power stations. So intense is the current that if it were left flowing for a tenth of a second, the copper of the coil through which it passed would melt. Acting on the permission to be completed in 1,100 of a second—London, July 8.

Keelva Fellowship

Ottawa, Ontario—Archibald John Grace, founder of St. Lawrence, and a Saskatchewan Rhodes scholar in 1926, has successfully completed at London, England, his final examinations for a fellowship in the Royal College of Surgeons of England, and is expected to return to Canada shortly, according to word received here.

Apples boast a strong power over potatoes. A stream of air passed first over the fruit is said to dwarf the sprouts of the vegetables.

The total capacity per day of the four mills of Canada during last year was nearly 112,000 barrels.

W. N. U. 1936

Six-Horse Dray Team Sold

Famous Horse Will Be Missed On Winnipeg Streets.

Winipeg's famous six-horse dray team, for years a feature of the Royal Winter Fair at Toronto will be seen no more in Canada, for the entire outfit has been sold by Shee's Brewery to the Anheuser Busch Company of St. Louis, reputed as the largest brewing company in the world.

The price, admittedly tempting, was paid in U.S. funds and the beautiful harness went with the famed horses. The horses were shipped south and "Andy," their well-known driver, went with them to make delivery.

Pat Shee, Sr., the man who came along without a dollar in his pocket 20 years ago, a rather poor contractor's laborer, now a feeble old man, made no effort to hide his feelings. There were tears in his eyes as the six magnificent imported Clydesdales were harnessed and led from their Winnipeg barns for the last time.

Gold Rush Days Revived

Town of Quesnel, B.C. Is Buzzing With Activity

Twelve months ago, gold values, perhaps even exceeding that period—the British Columbia mining community of Quesnel, B.C., is humoring with activity as business and tradesmen on the heels of gold seekers in Quesnel's second major gold rush.

Stores, cabins, auto camps, houses and additions to building projects are springing up like mushrooms everywhere. Almost every day a new building is started. Real estate is mounting. Many old buildings from 10 years ago are changing hands at prices ranging from \$1,000 to \$1,200. Old-established business places have had to increase their help to keep up with the new business pouring in.

Winnipeg Newspaper Union

By Ruth Rogers

CHARM AND SMART SOPHISTI-
CATED FOR YOUNG DAUGHTERS

She'll love this darling dress with its smart puffed sleeves.

And mother will love it too. It's a

The original model was carried out in a washing crepe silk in pin dot print. It's so lovely for more "simple" best as well as for more ordinary patterns.

If you are planning ahead for warm weather, dainty prints, batiste prints, linen, organdy, etc., are dainty and pretty.

Style No. 507 is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1½ yards of 36-inch fabric with ½ yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or 25 cents in preferred). Wrap coin carefully.

U. S. TO WATCH THE EFFECTS OF LOWER TARIFFS

Washington.—The United States Government will be in no position to say if it is saving the world from economic war if international efforts at the world economic conference should fail to achieve lowered trade barriers.

At the same time, officials expressed some concern lest strong national feelings in the parts of the world should lessen the prospects of success not only at London but in the arms reduction conference at Geneva.

Open was the question as to the prospect of lowering tariffs and other trade barriers at the London conference opening June 12, has been expressed by Assistant Secretary Raymond Moley of the state department, close advisor of President Roosevelt, as one of the most important aspects of his domestic reconstruction programme.

Secretary Cordell Hull of the state department, a life-long advocate of low tariffs, has taken a more optimistic view in general but has told newsmen he is not yet prepared to say whether tariff moderation will be the objective or whether the goal will be finally abandoned and every nation turn back upon a policy of commercial isolation.

Other nations, however, definitely, though privately, that the United States is putting itself in a position to embark on a policy of comparative commercial independence of the rest of the world and to work out a more self-sufficient national economy if efforts at international union fail.

United States officials were regarded as having watched with some concern the progress of the United Kingdom in concluding special trade treaties with Argentina, Sweden, Norway, and others, and in addition to the close commercial relations among the members of the British Empire, fostered by the trade agreements reached at last summer's economic conference at Ottawa.

Limit Wheat Production

League Of Nations To Submit New Plan At London Conference

The League of Nations' committee of the League of Nations was informed of a definite plan for international action to deal with the wheat surplus.

The council received and adopted a report from the economic committee saying when delegates to the international wheat conference meet again in London they hope to submit to the world economic conference a plan providing:

1. For limitation of production and necessary of exports.

2. For liquidation of stocks.

3. For maintenance of a reasonable import margin in European import countries.

"A substantial rise in the price of wheat," the report said, "is the powerful remedy for the distress of agriculturists and would help materially in mitigating the general depression."

Economic Council Advised

Ottawa, Oct.—Establishment of an economic council in Canada, to comprise half a dozen men of outstanding ability, was advocated before the Canadian Political Science Association here. It should be a "thought organization" and one of its chief functions would be to advise governments on economic and social questions.

Liquor Exports Illegal

Ottawa, Oct.—Exportation of liquor to the United States, either for medicinal purposes or for sale, under existing regulations, states the department of national revenues. At present no beverage beyond 3.2 alcoholic content can be granted clearance to the public, officials said.

Patrol Boat Makes Salute

Victoria, B.C.—Making her first seizure since her arrival here from the east coast, the Royal Canadian Mounted Police patrol boat "Adversus" picked up the Vancouver gambler "Aileen" Sunday with 135 cases of Canadian liquor on board.

Believe France Will Default

Paris, France.—Belief that France will default on her debt payment due to the United States June 15 seems to have become widespread in Paris closer to the government. The amount of the French instalment due for payment June 15 is \$40,738,000.

Game Law Changes

Seek More Uniformity In Western Canada Regulations

Edmonton, Alta.—Important changes in the game laws of the prairie provinces are in prospect by the respective governments shortly. As a result of negotiations between Alberta, Saskatchewan and Manitoba, game commissioners last week, recommendations will be made to their respective ministers, with the approval of approval and early adoption.

Uniformity in the fur tax is one of the chief points involved in the prospective changes. The game commissioners are agreed that there should be a uniform fur tax on the three provinces and that there should also be full co-operation in its collection. New regulations under the act, embodying this change, if finally approved, will be issued early in July.

Agreement has also been reached on the proposal to ban bird and game licenses. In the case of Alberta, it is understood, only such changes will be involved.

General approval of a system of leased areas for trapping has been won by the game experts who agree that such a system would be in the interests of conservation. The question will be investigated during the year, with a view to gathering information leading up to possible legislation at the next sessions of the legislature.

Big Housing Campaign

Move To Clean Up Slum Conditions In England

London, Eng.—The government has started a massive slum-clearing campaign when the ministry of health issued circulars to all housing authorities and county councils in England and Wales calling on them to co-operate in a five-year slum-clearing scheme to provide cheap rent houses for working men.

The policy is one government circles believe will open a new era in housing. It marks a sharp departure from the government's subsidy system which has been in operation for two decades. Except in limited cases the subsidies will be terminated and the field thrown open to the private builder.

Under the plan, which will be carried out by building associations, those families whose fund consist-

of mainly savings of small investors, may now lend only on first mortgages up to the old Tardieu scheme for the destruction of heavy mobile guns, tanks and other offensive weapons.

Thus did the foreign minister of France revive and give emphasis to the old Tardieu scheme for the internationalization of heavy mobile guns, tanks and other offensive weapons.

A German spokesman, commenting afterwards, said that M. Paul-Boncour's announcement meant France no longer accepts the British policy of neutrality.

M. Paul-Boncour explained to the conference that the powers which are committed to give financial help to the country which is victim of an aggression would avoid waste by concentrating war materials to the League instead of having them manufactured anew by the state attacked.

The French minister flatly announced that France would not reduce its armaments unless a definite system of mutual assistance is created, supplemented by genuine supervision of armaments.

The supervisor, he said, must especially cover armaments which are manufactured in private factories.

Geneva.—France brought a new problem before the disarmament conference, when Foreign Minister Joseph Paul-Boncour opposed the destruction of heavy material and advocated its preservation for use by the League of Nations against an aggressor.

Destruction of heavy war material is provided for in the British plan which is supported by the United States and Germany, as well as by its author.

Thus did the foreign minister of France revive and give emphasis to the old Tardieu scheme for the destruction of heavy mobile guns, tanks and other offensive weapons.

A German spokesman, commenting afterwards, said that M. Paul-Boncour's announcement meant France no longer accepts the British policy of neutrality.

M. Paul-Boncour explained to the conference that the powers which are committed to give financial help to the country which is victim of an aggression would avoid waste by concentrating war materials to the League instead of having them manufactured anew by the state attacked.

The French minister flatly announced that France would not reduce its armaments unless a definite system of mutual assistance is created, supplemented by genuine supervision of armaments.

The supervisor, he said, must especially cover armaments which are manufactured in private factories.

Lord Wemyss Dies

Was Great Grandson Of King William IV.

Cannes, France.—Admiral of the fleet, Lord Wemyss Wemyss, great grandson of William IV., third cousin of King George, first and last baron of Wemyss, died at the armistice for Great Britain, died at his villa here at the age of 68.

Rosslyn Erskine Wemyss, made a baron in 1919, joined the navy in 1901, became a captain in 1914, commander of the squadron which landed troops in Gallipoli in April, 1915, only to withdraw them the following winter.

As chief of naval staff and chief naval adviser at the Paris Peace Conference of 1919 was high praise for settlement of naval terms.

Woman Lawyer

Newfoundland Judge Gives Welcome To Woman Practitioner

St. John's, Newfoundland.—Louise Saunders, the first woman lawyer to practice in Newfoundland, was welcomed by Central District Court Judge F. J. Morris, K.C., when she appeared on behalf of a client in a civil action.

Constituting her on her success attained in her examinations and in wishing her an extensive practice Judge Morris said that under modern conditions it was not too much to hope that she would attain the "woolly sack," the chief justicehip.

FRANCE BRINGS NEW PROBLEM TO WORLD COURT

Geneva.—France brought a new problem before the disarmament conference, when Foreign Minister Joseph Paul-Boncour opposed the destruction of heavy material and advocated its preservation for use by the League of Nations against an aggressor.

The vicecount, for years a colleague of Mr. MacDonald in the Labor Department, declared the Prime Minister might better have saved time and expense than to have gone to Washington for President Roosevelt's economic discussions.

"There were no results," Lord Snowdon said, "except a repetition of the plan which we have heard a score of times in connection with the forthcoming conference."

The speech was made in the course of a debate on British policy at the world economic conference opening June 12.

Well-Known Sea Captain

Vancouver, B.C.—Captain Gustave Follement, 65, one of the best known sea captains and pilots on the British Columbia coast and Arctic waters, no longer accepts the British plan of neutrality.

M. Paul-Boncour explained to the conference that the powers which are committed to give financial help to the country which is victim of an aggression would avoid waste by concentrating war materials to the League instead of having them manufactured anew by the state attacked.

The French minister flatly announced that France would not reduce its armaments unless a definite system of mutual assistance is created, supplemented by genuine supervision of armaments.

The supervisor, he said, must especially cover armaments which are manufactured in private factories.

Geneva.—France brought a new problem before the disarmament conference, when Foreign Minister Joseph Paul-Boncour's announcement meant France no longer accepts the British policy of neutrality.

M. Paul-Boncour explained to the conference that the powers which are committed to give financial help to the country which is victim of an aggression would avoid waste by concentrating war materials to the League instead of having them manufactured anew by the state attacked.

The French minister flatly announced that France would not reduce its armaments unless a definite system of mutual assistance is created, supplemented by genuine supervision of armaments.

The supervisor, he said, must especially cover armaments which are manufactured in private factories.

UNITED STATES DELEGATES TO WORLD PARLEY

Montreal, Que.—The three delegates selected by President Roosevelt to represent the United States at the World Economic Conference to be held in London this month, when the nations of the earth will endeavour to formulate plans for putting the world out of the throes of depression. At the left is Cordell Hull, Secretary of State; right is James M. Cox, of Ohio, who was the Democratic nominee for the Presidency in 1920, and in the centre is Senator Key Pittman of Nevada.

Preferred List

Many Prominent Men In List Of Customers Of J. P. Morgan

Geneva.—The names of men high in public and business life were put into the record of a Senate committee in the presentation of a list of preferred customers of J. P. Morgan and Company.

Among them were William H. Woodin, new secretary of the United States treasury; William Gibbs M. Adoo, Charles Francis Adams, Owen J. Roberts, John R. Nutt, John J. Raskob and Newton D. Baker. None of these men, it was noted, at the times they were recorded as having been sold stock by the Morgan Company at preferred prices.

As list after list of prominent men recited in the record, the interrogator asked the committee, under questioning, that he had paid income taxes in England for the years of 1931 and 1932. He previously had testified that because of financial losses, he had not paid taxes in the United States for those years.

Under the British laws, losses of capital generally cannot be deducted from income taxes returned in Great Britain. Such losses may be deducted under the United States laws.

Oxford Group

Large Number Of "Changed" Canadians Gathering At Quebec City

Ottawa, Ont.—While members of the Oxford Group, led by Dr. Frank D. Buchman, are in Ottawa for the next few days, trains from as far west as Vancouver are speeding eastward with special carloads of students to attend the final session to be held in Quebec City from May 26 to June 5.

Dr. Buchman said that the experience of the team in North America since its arrival last fall has been truly remarkable.

ACCEPTANCE OF TITLES IN CANADA IS OPEN QUESTION

Ottawa, Ont.—Premier R. B. Bennett declined to say there would be title granted to Canadians until parliament had considered the broad question of the acceptance of titles which could be granted by the king, Rt. Hon. Mackenzie King, Liberal Leader, was told, without the consent or approval of parliament or ministers. It was the opinion of the government the Nickel anticongress resolution of 1919 no longer restrained Canadians from accepting titles.

The short incident ended in the visit of the two party leaders. "I do not wish," said M. King, "to deprive the Prime Minister of being able to make a statement in the name of his majesty, but all I would ask him is that before a title that kind is accepted by himself or anyone else an opportunity be given this parliament to express its views in respect to titles in this country."

"I suppose I should say," replied the Prime Minister, "that if the Liberal Leader thinks he has added to the courtesy of debate, or established friendly personal relations with the king, he is welcome to do so."

"I am not in a position to say," said M. King, "but I think the Prime Minister thinks his lecture will improve the amenities of parliament. What I said was perfectly reasonable in the circumstances."

It was a remark which was understood by members of the House and which will be understood by the country in the spirit in which it was made.

"I am not in a position to say," said M. King, "but I think the Prime Minister thinks his lecture will improve the amenities of parliament. What I said was perfectly reasonable in the circumstances."

It was a remark which was understood by members of the House and which will be understood by the country in the spirit in which it was made.

"Hear, hear!" agreed the Prime Minister, turning to other considerations.

Although no reference was made to it in the House, parliamentary custom soon bound with rumors concerning the king's birthday list of honors. It was agreed nothing stood in the way of a Canadian being tendered and accepted a title in the land of his birth. The House of Commons took some action in the meantime, the New Year's list.

The whole question of titles will likely be introduced anew in the House next session, but whether this will be before or after the New Year is uncertain.

NEW DRAFT OF SECURITY PACT TO BE SUBMITTED

Geneva, Switzerland.—Sir John Simon, British Secretary of State for Foreign Affairs, proposed a new pact before the security consultative conference.

Sir John told the conference his revisions were to conform with United States policy, particularly the American desire to refrain from any act of retribution, measures which the League of Nations may take against an aggressor.

This doctrine, the United States representative, Norman H. Davis, said, would be embodied in an unilateral declaration to be made shortly by the Washington Government.

The amended clauses of the British draft stipulate that in case of a breach or threat of a breach of the Briand-Kellogg pact, the league or any non-member may propose general consultation.

The object of this consultation would be:

1. To exchange views for the purpose of preserving peace and averting threatened war.

2. In the event of a breach, to use good offices for the restoration of peace.

3. If it is found impossible to restore peace, to determine which party is responsible, to dispute the to be held responsibility.

If it is possible to identify the aggressor, Mr. Davis said, the United States Government undertakes to refrain from any action likely to distract the concerted efforts of other nations to deal with the offending state.

United States, moreover, the American delegate announced, will not give protection to any American citizen who may engage in activities to defend or support the aggressor.

The security committee of the conference defined an aggressor as a nation which is the first to commit any of the following acts:

Declaration of war, invasion by land, air or sea, or by blockade or bombardment of another state with or without declaration of war. Attack by land, naval or air forces, a naval blockade, or support to armed bands formed in its territory which have invaded another state or refusal to deprive them of protection.

No political, military, economic or other considerations may excuse or justify aggression, according to the definition agreed upon by the security commission.

Purchase Russian Railway

Japanese Approve Plan To Acquire Railway In Manchuria

Tokyo, Japan.—The cabinet has approved procedure proposed for the purchase from Soviet Russia of the Chinese Eastern Railway in Manchuria.

Three steps were suggested:

1. The State of Manchukuo is to negotiate the purchase under Japan's guidance, fixing the amount and the terms of payment.

2. Because of doubt concerning the transfer of the railway to Manchukuo, the Japanese are to buy directly the undivided control of the railway by the Soviet.

3. Manchukuo is to purchase half the mining and other concessions held by the Japanese in the Chinese Eastern, thus eliminating Soviet influence in north Manchuria.

The sale negotiations are authoritatively expected to open shortly in Tokyo.

Attempted Liquor Steal

Vancouver, B.C.—Breaking into a Canadian Pacific Railway freight car eastbound from Vancouver thieves threw off 95 cases of liquor. Railway officials stated that 56 cases had been picked up along the right-of-way of the Canadian Pacific, about 50 miles east of Vancouver.

Another Trade Treaty

London, Eng.—Great Britain has now signed with Canada a trade agreement which will come into force on July 1. The agreement covers coal, iron and steel, and other products.

London, Que.—With the arrival of two officers of the Italian air force here, preparations are being made for the arrival of the fleet of Italian seaplanes, which will attend the Century of Progress Exposition at Chicago.
